

Art4Life® Program in Georgia

Would you be interested in a no-cost, CMP grant-funded, high quality, therapeutic art program for your Georgia skilled nursing center? **Hurry... Deadline is Oct 31, 2024**

The Thriving4Life nonprofit organization is applying for a CMP grant for Georgia homes to receive our Art4Life program after successful projects in 100 skilled nursing centers in both Tennessee & South Carolina – with tremendous results.

This dignity-promoting arts initiative can be offered to residents and patients in individual or group settings to offset the effects of isolation, trauma, PTSD, addiction, Alzheimer’s Disease, cognitive, mental, developmental, or other impairments. It’s for everyone!

We train your staff to deliver this therapeutic, expressive, fine-arts program that greatly differs from arts and crafts. The grant will include quality art materials, Art4Life program training, resources, support, access to an art exercise library created by art therapists, and listing your care center on our website as a “Participating Community” – so potential residents and families can find you!

We have so much to share with you. Go to the Georgia grant page of our Thriving4Life organization’s website to find out more, like:

- What is the Art4Life program?
- What impact has this program had for skilled care centers in other states?
- What would be included in the program and grant?
- How can you participate in this opportunity?
